

Lost in the Woods - MVP Requirements Specification

Game Vision

Lost in the Woods is an AI-assisted narrative survival game where players explore a mysterious forest, make decisions, collect items, encounter strange characters, and attempt to survive as long as possible. The game is intentionally unpredictable. Choices that appear safe may result in death, curses, or traps, while risky choices may unlock powerful rewards and extend a run. The story is designed to continue indefinitely through AI-generated events, allowing exceptionally lucky and skilled players to survive far beyond a traditional decision tree experience.

Major MVP Requirements

1. Character Creation (No Registration)
2. AI-Powered Story Engine
3. Dynamic Choice Generation
4. Hidden Danger System
5. Endless Progression Capability
6. Forest Location System
7. NPC Encounter System
8. Item & Reward System
9. Story Narration (Text-to-Speech)
10. Atmospheric Audio System
11. Multiple Endings
12. Leaderboard Tracking

Epic 1 – Character Creation

Players select gender, hair color, skin color, and clothing color using left/right selectors. No login or registration is required.

Epic 2 – Narrative Engine

Story events are presented as narrative scenes. The engine drives exploration, encounters, and progression.

Epic 3 – Dynamic Choice System

Choices are generated by AI and categorized with traits such as Brave, Curious, Risky, Friendly, or Careful. The game is not limited to a fixed set of decisions.

Epic 4 – Hidden Danger System

Every choice affects hidden danger values. Danger is never displayed. Safe-looking choices can increase danger and cause death. Dangerous-looking choices may provide rewards or survival opportunities.

Epic 5 – Endless Story Progression

Runs are not capped by a fixed story length. AI-generated content allows the adventure to continue indefinitely when favorable choices and luck align.

Epic 6 – Forest Locations

The world contains reusable location templates including clearings, swamps, cliffs, streams, ponds, and dense forests rendered with geometric 2D visuals.

Epic 7 – NPC Encounters

Players encounter characters such as hunters, grandparents, peddlers, ghosts, dwarves, and werewolves. Encounters may help, hinder, or threaten survival.

Epic 8 – Item System

Items provide boosts, protection, or special opportunities. Valuable items are often obtained through high-risk decisions.

Epic 9 – AI Story Generation

Backend AI generates events, choices, and narrative outcomes while respecting the dark fairy-tale forest theme.

Epic 10 – Audio & Narration

Spooky background music plays throughout the experience. Story text can be narrated using browser text-to-speech.

Epic 11 – Endings

Multiple endings are possible including escape, death, transformation, becoming lost forever, and rare secret outcomes.

Epic 12 – Leaderboard

Track and display the longest survival runs based on events survived and overall progression.
